EDUCATION

University Of Engineering And Technology

Bachelor of Science in Computer Science

Lahore, PK

Nov. 2021 – May 2025

Government Islamia Graduate College

Intermediate Pre Engineering

Kasur, PK

April. 2019 – August 2021

EXPERIENCE

Associate Data Analyst

Zapta Technologies

Nov 2025 – Present

Lahore, PK

- Designed and maintained scalable data pipelines using Apache Kafka, AWS S3, and Snowflake to ingest, process, and store large-scale streaming and batch datasets.
- Built ETL workflows using AWS Glue and Snowflake to transform raw data into analytics-ready datasets for reporting and downstream applications.
- Leveraged AWS Lambda and EC2 to automate data processing tasks, orchestrate pipeline operations, and ensure reliable data ingestion and transformation.

PROJECTS

Real Stock Market Streaming Project | *Docker, Kafka, DBT, Snowflake Python*

2025

- Built a real-time stock market data streaming pipeline to ingest continuous event data from external APIs and streaming sources.
- Implemented a streaming ingestion layer to process high-volume events and load raw data into Snowflake Raw Layer for persistent storage.
- Designed a staging pipeline in Snowflake to perform data quality checks including deduplication, data type validation, and incremental filtering.
- Transformed cleaned data into dimensional models (fact and dimension tables) within the Snowflake Data Mart for analytical workloads.

Snowflake ELT Pipeline | *Snowflake, SQL, Python*

2025

- Developed end-to-end ETL pipelines using Snowflake for enterprise data warehousing.
- Implemented data transformation, validation, and loading processes for analytics-ready datasets.
- Optimized storage and query performance using Snowflake best practices.

AWS Serverless Data Pipeline | *AWS Lambda, S3, Python*

2025

- Built event-driven data pipelines using AWS Lambda for real-time and batch data processing.
- Integrated Amazon S3 for scalable data storage and ingestion workflows.
- Designed fault-tolerant serverless architecture for cost-efficient data processing.

Business Intelligence Dashboards | *Power BI, Excel*

2025

- Designed interactive dashboards to track KPIs, trends, and business performance metrics.
- Built data models, DAX measures, and visual reports for executive decision-making.
- Automated data refresh and reporting workflows for operational efficiency.

Youtube Analytics Pipeline | *AWS S3, Python, PySpark, AWS Glue, AWS Lambda*

2025

- Designed and implemented an end-to-end AWS-based data lake pipeline to ingest, process, and analyze large-scale CSV and JSON datasets.
- Built a Medallion-style architecture in Amazon S3 with Raw, Processed, and Analytics layers.
- Developed workflows using AWS Glue and AWS Lambda to clean, transform, and convert raw data into optimized Parquet format.
- Implemented monitoring and access control using AWS CloudWatch Logs and IAM roles.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C/C++, JavaScript

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel

Databases: MySQL, PostgreSQL, MongoDB, BigQuery

Data Engineering Tools: Snowflake, AWS S3, AWS Lambda

Machine Learning & NLP: Scikit-learn, NLTK, Hugging Face, LDA

Developer Tools: Git, Docker, VS Code, PyCharm, Jupyter Notebook

Cloud Platforms: Google Cloud Platform (GCP), AWS

Other Skills: N8N, Data Cleaning, ETL Pipelines, Dashboarding, Data Modeling

HONOURS AND AWARDS

SayabiDevs Coding Hackathon | *SayabiDevs Limited*

Karachi, PK

- Demonstrated strong coding skills in the Sayabidevs Virtual Coding Hackathon.
- Utilized Python to efficiently complete complex tasks and challenges.
- Proven readiness for advanced coding roles and opportunities in technology.

CERTIFICATION

Generative AI Application Developer | *Pak Angels, Silicon Valley*

California, USA

- Completed a Generative AI Application Developer training program that explored the future of artificial intelligence and its real-world impact.
- Gained practical experience creating AI-powered chatbots and applications.
- Worked with platforms like Hugging Face to build and deploy intelligent conversational bots.

Snowflake Certification | *Datacamp*

New York, NY

- Applied data modeling techniques including ER, Dimensional Modeling, and Data Vault to design efficient cloud data warehouse structures in Snowflake.
- Transformed raw datasets into structured and analytics-ready models using normalization and best practices in data modeling.
- Leveraged Snowflake's architecture and MPP capabilities to optimize data retrieval, storage, and analytical performance.
